

# MOHIT GAWANDE

Sausar, Chhindwara, Madhya Pradesh, India

+91-[8308612572](tel:8308612572) [gawandemohit54@gmail.com](mailto:gawandemohit54@gmail.com) [linkedin.com/in/mohit-gawande-774402253](https://www.linkedin.com/in/mohit-gawande-774402253)

---

## Objective:

Full-Stack Web Developer skilled in **React.js, Next.js, Node.js, Express.js, MongoDB, Tailwind CSS**, and RESTful APIs. Strong foundation in **Data Structures & Algorithms (C++)**, authentication systems, and responsive UI development. Experienced in building scalable web applications, integrating AI-driven features, and working in agile environments with Git-based workflows.

## Technical Skills & Tools:

- **Frontend & UI/UX:** HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS
- **Backend & APIs:** RESTful APIs, Authentication, Node.js, Express.js, MongoDB
- **Programming & DSA:** C++, Data Structures & Algorithms (Intermediate)
- **Tools & Deployment:** Git, Postman, GitHub, VS Code, Clerk, Vercel, Netlify
- **Soft Skills:** Fast Learner | Adaptability | Problem Solving | Communication | Team Collaboration

## Experience:

### Web Development Intern

Uptoskills | Feb 20, 2026 – Present

- Built and optimized **10+ reusable UI components**, improving page responsiveness across devices.
- Developed **RESTful APIs and authentication modules** using Node.js and MongoDB to manage user data securely.
- Reduced UI load time by **30%** through layout and component optimization.
- Collaborated in Git-based workflows, debugging issues and improving overall application performance.

## Education:

B. Tech (Computer Science Engineering) | CGPA: 8.22

2022 - Present

12<sup>th</sup> | PCM | 75%

2021 – 2022

## Projects:

### 1. PashuGyan — AI/ML Livestock Breed Identification Web Application (Next.js, Node.js, MongoDB)

- Designed and developed a scalable Next.js + Node.js application for image-based livestock breed identification that displays the predicted breed, confidence score, and detailed breed insights.
- Implemented RESTful APIs and optimized request handling for image uploads and ML predictions, collaborating closely with the ML team to ensure accurate and reliable outputs.

### 2. AI SaaS Tools Platform — Full-Stack React Application with Authentication & Payments

- Developed a full-stack AI SaaS platform using React.js and Tailwind CSS, delivering multiple AI-powered tools through a modular and reusable component architecture.
- Implemented secure authentication, user profiles, usage credits, and payment workflows using Clerk, along with backend APIs and efficient state synchronization.

## Certifications:

- Udemy — HTML, CSS & JavaScript for Beginners
- Infosys Springboard — JavaScript Certification
- IBM SkillBuild — Getting Started with Gen AI

## Achievements:

- Participated in **Intellecathon 2025** – National Level Hackathon
- Secured **2nd Runner-Up** in Internal SIH Hackathon 2025
